What is SQ Trans?

SQ Track is the complete solution for GPS tracking, communication with drivers and Garmin navigation. SQ Track in every moment, wherever you are, gives you information on current vehicle's location, speed and other data from an onboard computer. The tracking system is updated by Garmin's international interface which means a driver can now safely use navigation system and send/receive Garmin messages and addresses. The system also supports remote digital tachograph download and precise control of fuel consumption.

SQ Track allows you 24/7 control over your drivers and vehicles which guaranteed save your costs.

Main advantages:

- Communication with a driver through GARMIN navigation system
- Send addresses and get calculated the estimated time of arrival
- Satellite cargo tracking for your clients
- Automatic creating trip orders
- Automatic daily pays calculations
- Analyses of drives and an option to connect an onboard computer
- Enable additional sensors for add-on features

How to save money?

Imagine how could you automatically and remotely download tachograph data on your own computer and also have precise control of fuel consumption.

Imagine how could you optimize and plan a route in every single moment. You know exactly when a driver drives with high RPM, rapidly accelerate or brake which could prevent a breakdown of the vehicle.

Imagine lower insurance bill for your fleet.

With SQ Track you can achieve all described in reality!

100 % GUARANTEED

100% SATISFACTION

7 x why to choose SQ Track:

- 24/7 access to data from everywhere
- Access to tracking system from mobile phone or tablet
- Single subscription for whole Europe
- International certificates of relevance
- Manageable you don't need a learning course
- Remote digital tachograph download
- Full control over drivers

Call now and we will tell you more reasons why SQ Track is the best solution for you!
