What is SQ Label?

SQ Label is an application which enables fast and easy design and printing of labels and a variety of barcodes. The main advantage of SQ Label is its ease of use and the ability to be customized further to better suit your work process.

SQ Label includes all functions prerequisite for label design. Fully - customizable text utilizing any TrueType font, images, and an assortment of industry-standard 1D and 2D barcodes can be embedded into your label designs to meet your business partners' requirements.

SQ Label has become ubiquitous for any business!

Main advantages:

- Supports all major barcode types
- Easy label serialization
- Can source data from SQL database
- Dynamic printing of pictures and logotypes
- Can auto-size text based on available space
- Simple and professional design of labels
- Advanced print preview using actual data

How to save money?

Our developer team aimed for best efficiency and simplified connectivity with your workflow process while designing SQ Label.

By enabling you to use your existing data and databases as data sources for your labels, SQ Label enables you to rapidly implement label printing and integrate it into your workflow process.

SQ Label enables you to meet labeling, barcode and form requirements by yourself, thus saving you valuable time.

You can print labels and barcodes by yourself. Fast and easy!
